SOFT SKILLS

Communication, Empathy, Open-Mindedness, Problem-Solving, Critical Thinking, Collaboration/Teamwork

CERTIFICATIONS

Nov 2023 – Jun 2024

Java Full Stack Training – SCALive, Bhopal

Aug 2024 – Jan 2025

Java Developer Internship – Hybrid

OBJECTIVE

Enthusiastic Java Developer skilled in backend and frontend technologies like Java SE, Java EE, Spring Boot, and React.js. Experienced in building scalable web applications using MVC architecture and REST APIs. Proficient in working with databases, security implementations, and cloud deployment. Adept at writing clean, maintainable code and collaborating in cross-functional teams. Quick learner with a passion for solving real-world problems.

EXPERIENCE

SCALive Pvt Ltd

Jun 2024

Java Full-Stack Developer (Intern)

- Developed responsive UI using HTML, CSS, JavaScript, and Bootstrap, improving user engagement by 15 percent.
- Built backend CRUD APIs using Java EE (JSP, Servlets, JDBC), reducing data processing time by 20 percent.
- Implemented MVC architecture for clean separation of concerns.
- Used Git for version control and team collaboration.
- Participated in full software development lifecycle from requirement gathering to deployment.

PROJECTS

GadgetHub E-commerce App (Full Stack)

Java, JSP, Servlet, JDBC, MySQL, HTML, CSS, JS, Bootstrap

- Built a full-stack e-commerce web app with secure user authentication and product management.
- Designed and optimized MySQL schema, improving query performance by 25 percent.
- Integrated order flow with admin panel and real-time tracking.
- Implemented role-based access control and input validation.

Library/Book Management System (Full Stack)

Java, React.js, Bootstrap, Spring Boot, Spring JPA

- Developed a full-stack Library Management System using React.js for frontend and Spring Boot for backend REST APIs.
- Implemented features like book search, borrow/return management, user login/signup, and admin panel for managing inventory.
- Integrated MySQL database using Spring Data JPA for persistent storage of books and user data.
- Used Axios for API calls, React Router for navigation, and Bootstrap for responsive UI design.

React E-commerce App (Frontend)

React.js, Redux, Bootstrap, JavaScript

- Built a fully responsive frontend connected to backend APIs via Axios.
- Created reusable product components using 'map()' for dynamic rendering.
- Managed global state using Redux for consistent cart/user handling.
- Added features like product search, filtering, and rating-based sorting.
- Optimized performance with lazy loading and clean code structure.
